Cemented Carbide Drawing Die

Our superiority

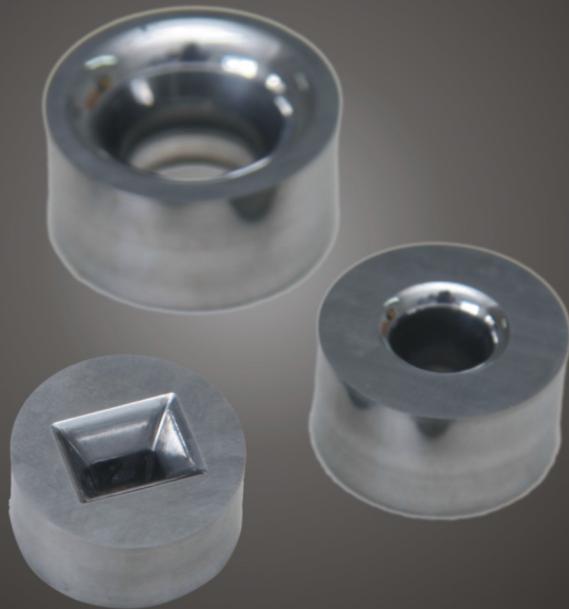

- We has been concentrating on the specialized fields for 50 years.
- The products are of top quality. Standardized and customized products in various grades and types are available.
- We is a state-rank high tech company, having a postdoctoral scientific research workstation
- Sparing no efforts to develop and seek for new materials to improve product quality and new processing methods to maximize machining practice.

Content

Grades, properties and recommended applications of cemented carbide for drawing	1
Classification and type indication rules of cemented carbide drawing dies	2
Type 11 cemented carbide core blanks of drawing dies for drawing wires of ferrous and non-ferrous metals	4
Type S11 cemented carbide core blanks of drawing dies for drawing wires of ferrous and non-ferrous metals	6
Type Z11 cemented carbide core blanks of drawing dies for drawing wires of ferrous and non-ferrous metals	7
Type Z11 cemented carbide core blanks of drawing dies for drawing wires of ferrous and non-ferrous metals (improved)	8
Type 13 cemented carbide core blanks of drawing dies for drawing wires of ferrous and non-ferrous metals	10
Type S13 cemented carbide core blanks of drawing dies for drawing wires of ferrous and non-ferrous metals	13
Type Z13 cemented carbide core blanks of drawing dies for drawing wires of ferrous and non-ferrous metals	15
Type Z13 cemented carbide core blanks of drawing dies for drawing wires of ferrous and non-ferrous metals (improved)	16
Type 22 cemented carbide core blanks of drawing dies for drawing tubes of non-ferrous metals	18
Type 23 cemented carbide core blanks of drawing dies for drawing tubes of non-ferrous metals	20
Type 30 cemented carbide core rod blanks of drawing dies for drawing tubes	21
Type 30 cemented carbide core rod blanks of drawing dies for drawing tubes (improved)	23
Type 31 cemented carbide core rod blanks of drawing dies for drawing tubes	24
Type 40 cemented carbide core blanks of drawing dies for drawing square rods	25
Type 41 cemented carbide core blanks of drawing dies for drawing rectangle rods	27
Type 42 cemented carbide core blanks of drawing dies for drawing flat rods	28
Type 60 cemented carbide core blanks of drawing dies for drawing hexagonal rods of ferrous metals	31
Technical requirements of products tolerances	33

Grades,properties and recommended application of cemented carbide for drawing dies

Grade	Physical and mechanical properties			Recommended application
	Density(g/cm ³)	Hardness (HRA)	Transverse rupture strength(N/mm ²)	
YG6X	14.93	92.5	2800	good wear resistance; suitable for drawing steel wires, wires and rods of non-ferrous metals and alloys with a diameter less than ϕ 20mm, or tubes of steel,non-ferrous metals and alloys with a diameter less than ϕ 10mm.
YG6A	14.70	93.0	2500	good wear resistance; suitable for drawing steel wires, wires and rods of non-ferrous metals and alloys with a diameter less than ϕ 20mm, or tubes of steel,non-ferrous metals and alloys with a diameter less than ϕ 10mm.
ZK10UF	14.85	93.0	2600	comprehensive properties better than YG6X;suitable for drawing steel wires,wires and rods of non-ferrous metals and alloys with a diameter less than ϕ 20mm,or tubes of steel ,non-ferrous metals and alloys with a diameter less than ϕ 10mm,requiring a higher surface roughness.
ZK20UF	14.60	92.5	2600	not only toughness but also good wear resistance; suitable for drawing steel wires,wires and rods of non-ferrous metals and alloys with a diameter less than ϕ 20mm, or tubes of steel ,non-ferrous metals and alloys with a diameter less than ϕ 10mm,requiring a higher surface roughness,in condition of a larger stress.
ZK30UF	14.40	91.5	3100	not only toughness but also good wear resistance; suitable for drawing steel wires,wires and rods of non-ferrous metals and alloys with a diameter less than ϕ 20mm, or tubes of steel ,non-ferrous metals and alloys with a diameter less than ϕ 10mm,requiring a higher surface roughness,in condition of a larger stress.
ZK20(YG6)	14.95	91.2	2800	not only toughness but also good wear resistance; suitable for drawing steel wires,wires and rods of non-ferrous metals and alloys with a diameter less than ϕ 20mm, or tubes of steel ,non-ferrous metals and alloys with a diameter less than ϕ 10mm,requiring a higher surface roughness,in condition of a larger stress.

Grade	Physical and mechanical properties			Recommended application
	Density(g/cm ³)	Hardness (HRA)	Transverse rupture strength(N/mm ²)	
ZK30(YG8)	14.72	90.5	2800	suitable for drawing steel wires,wires and rods of non-ferrous metals and alloys with a diameter less than ϕ 50mm, or tubes of steel ,non-ferrous metals and alloys with a diameter less than ϕ 35mm in condition of a larger stress.
ZL35	14.43	89.2	3000	suitable for drawing steel tubes and rods,or wires,rods and tubes of non-ferrous metals and alloys,in condition of a very large stress and large compression rate.
YG15	14.05	87.8	3200	suitable for drawing steel tubes and rods,or wires,rods and tubes of non-ferrous metals and alloys,in condition of a very large stress and large compression rate.
ZL35F	14.00	88.7	3200	good toughness,resistance better than that of Yg15;suitable for drawing steel tubes and rods,or wires,rods and tubes of non-ferrous metals and alloys,in condition of a very large stress and large compression rate.
YG6Z	14.85	90.5	2200	suitable for drawing steel wires,wires and rods of non-ferrous metals and alloys with a diameter less than ϕ 50mm, or tubes of steel ,non-ferrous metals and alloys with a diameter less than ϕ 20mm in condition of a larger stress.
YG8Z	14.70	89.5	2400	suitable for drawing steel wires,wires and rods of non-ferrous metals and alloys with a diameter less than ϕ 50mm, or tubes of steel ,non-ferrous metals and alloys with a diameter less than ϕ 35mm in condition of a larger stress.

classification and type indication rules of cemented carbide drawing dies

1 Classification of the products

1.1 The series YS of drawing dies includes:type S11(round hole dies) , type S13(round hole dies);

1.2 The series YB of drawing dies includes:type 11(round hole dies),type 13(round hole dies) ,type 22(round hole dies) ,type 23(round hole dies) ,type 30(core head dies) ,type 31(core head dies) ,type 40(multilateral hole dies) ,type 41(multilateral hole dies),type 42(multilateral hole dies) ,type 60(multilateral hole dies) .

1.3 The series Z of drawing dies includes:type Z11(round hole dies),type Z11 improved (round hole dies),type Z13(round hole dies),type Z13 improved (round hole dies).

2 Type indication rules of drawing die blanks

Type type of drawing die blanks consists of five codes type namely:class,outside diameter,hight,compression angle (or outside conical angle),and parameter of inside hole.

example

11 - 013 10 10 - 1.6
(1) (2) (3) (4) (5)

(1). code of type class;

(2). code of outside diameter:indicated with three figures (unit in mm),zero will be added at the ahead of figures when the figures are less than three.

(3). code of height:indicated with two figures (unit in mm),zero will be added at the ahead of figures when the figures are less than two.

(4). code of compression angle (or outside conical angle):indicated with two figures (unit in degree),two zero will be used when there is no compression angle (or outside conical angle).

(5). code of the internal hole:

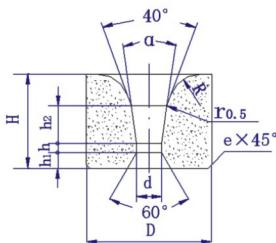

The round inside hole will be indicated with inside diameter d (unit in mm),two places of decimals will be taken when the inside diameter is not larger than 1 mm, and one places of decimals will be taken when the inside diameter is larger than 1 mm.

The quadrilateral hole will be indicated with a (hole length) x b (hole width),(unit in mm),two places of decimals will be taken when the length or width of the inside hole is not larger than 1 mm, and one places of decimals will be taken when the length or width of the inside hole is larger than 1 mm.

The hexagon hole will be indicated with s, s is the size of inscribed circle,unit in mm. two places of decimals will be taken when the size of inscribed circle is not larger than 1mm, and one places of decimals will be taken when the size of inscribed circle is larger than 1mm.

Note:the unit of a outside and inside diameter,height will be indicated in mm, and the angle will be indicated in degree.

Technical requirements of products tolerance

allowed maximal deviation of the inside diameter for round hole drawing dies.

Unit: millimeter (mm)

inside diameter	maximal deviation		inside diameter	maximal deviation	
	normal class	higher class		normal class	higher class
≤1	0 -0.10	0 -0.08	>16 ~ 24	0 -0.50	0 -0.30
> 1 ~ 2	0 -0.15	0 -0.10	> 24 ~ 32	0 -0.60	0 -0.50
> 2 ~ 4	0 -0.20	0 -0.12	> 32 ~ 40	0 -0.70	0 -0.60
> 4 ~ 6	0 -0.25	0 -0.15	> 40 ~ 50	0 -0.90	0 -0.75
> 6 ~ 12	0 -0.35	0 -0.20	> 50 ~ 70	0 -1.00	0 -0.90
> 12 ~ 16	0 -0.40	0 -0.25	> 70 ~ 90	0 -1.10	0 -1.00

allowed maximal deviation of the outside diameter for round hole drawing dies.

Unit: millimeter (mm)

outside diameter	maximal deviation		outside diameter	maximal deviation	
	normal class	higher class		normal class	higher class
≤10	+0.40 0	+0.20 0	>35 ~ 40	±0.50	±0.30
> 10 ~ 16	+0.50 0	+0.30 0	> 40 ~ 45	± 0.55	± 0.35
> 16 ~ 30	+0.60 0	+0.40 0	> 45 ~ 50	± 0.60	± 0.40
> 30 ~ 35	± 0.40	± 0.25	> 50	± 1.2%D	± 1.0%D

allowed maximal deviation of the height for round hole drawing dies.

Unit: millimeter (mm)

height	maximal deviation		height	maximal deviation	
	normal class	higher class		normal class	higher class
≤10	± 0.20	± 0.10	>30 ~ 50	± 0.50	± 0.40
> 10 ~ 20	± 0.30	± 0.20	> 50 ~ 60	± 0.70	± 0.55
> 20 ~ 30	± 0.40	± 0.30	—	—	—

Type (40|41|42|60)

allowed maximal deviation of the inside hole dimensions for multilateral hole drawing dies. Unit: millimeter (mm)

inside diameter	maximal deviation		inside diameter	maximal deviation	
	normal class	higher class		normal class	higher class
≤2	0 -0.25	0 -0.15	>20 ~ 25	0 -0.80	0 -0.60
> 2 ~ 4	0 -0.35	0 -0.20	> 25 ~ 32	0 -0.90	0 -0.70
> 4 ~ 6	0 -0.40	0 -0.25	> 32 ~ 40	0 -1.00	0 -0.80
> 6 ~ 12	0 -0.50	0 -0.35	> 40 ~ 50	0 -1.20	0 -1.00
> 12 ~ 16	0 -0.60	0 -0.45	> 50 ~ 60	0 -1.80	0 -1.20
> 16 ~ 20	0 -0.70	0 -0.50	> 60 ~ 75	0 -2.00	0 -1.40

Type (40|41|42|60)

allowed maximal deviation of the outside hole dimensions for multilateral hole drawing dies. Unit: millimeter (mm)

outside diameter	maximal deviation		outside diameter	maximal deviation	
	normal class	higher class		normal class	higher class
≤30	± 0.50	± 0.20	> 70 ~ 80	+1.50 -1.50	± 0.80
> 30 ~ 50	± 0.60	± 0.40	> 80 ~ 90	+1.60 -1.50	± 0.90
> 50 ~ 60	± 0.80	± 0.60	> 90 ~ 100	+1.80 -1.50	± 1.00
> 60 ~ 70	± 0.90	± 0.70	> 100 ~ 130	+2.00 -1.50	± 1%D

Type (40|41|42|60)

allowed maximal deviation of the height dimensions for multilateral hole drawing dies.

Unit: millimeter (mm)

height	maximal deviation		height	maximal deviation	
	normal class	higher class		normal class	higher class
≤20	± 0.40	± 0.20	> 40 ~ 50	± 0.60	± 0.50

> 30 ~ 40	± 0.50	± 0.40	—	—	—

Type (30\31)

allowed maximal deviation of the inside hole dimensions for core head type drawing dies.

Unit: millimeter (mm)

inside diameter	maximal deviation		inside diameter	maximal deviation	
	normal class	higher class		normal class	higher class
≤10	+0.70 0	+0.40 0	>20 ~ 30	+1.00 0	+0.70 0
> 10 ~ 20	+0.80 0	+0.55 0	> 30 ~ 40	+1.20 0	+0.80 0

Type (30\31)

allowed maximal deviation of the outside hole dimensions for core head type drawing dies.

Unit: millimeter (mm)

outside diameter	maximal deviation		outside diameter	maximal deviation	
	normal class	higher class		normal class	higher class
≥10 ~ 20	+0.60 +0.20	+0.50 +0.20	>40 ~ 50	+0.90 +0.20	+0.80 +0.20
> 20 ~ 30	+0.70 +0.20	+0.60 +0.20	> 50 ~ 60	+1.00 +0.20	+0.90 +0.20
> 30 ~ 40	+0.80 +0.20	+0.70 +0.20	> 60	+1.20 +0.20	+1.00 +0.20

Type (30\31)

allowed maximal deviation of the height dimensions for core head type drawing dies.

Unit: millimeter (mm)

height	maximal deviation		height	maximal deviation	
	normal class	higher class		normal class	higher class
≥10 ~ 20	± 0.35	± 0.20	> 30 ~ 40	± 0.55	± 0.40
> 20 ~ 30	± 0.45	± 0.30	> 40 ~ 50	± 0.60	± 0.50

other dimensional deviation

Unit: millimeter (mm)

basic dimensions	maximal deviation	basic dimensions	maximal deviation
≥0.2 ~ 0.5	± 0.10	> 3.0 ~ 6.0	± 0.25
> 0.5 ~ 1.0	± 0.15	> 6.0 ~ 10	± 0.35
> 1 ~ 3.0	± 0.20	> 10 ~ 15	± 0.45

allowed maximal deviation of the angle

Unit: millimeter (mm)

basic dimensions	maximal deviation
≤20°	± 1°
> 20° ~ 40°	± 2°
≥40°	± 3°

allowed maximal deviation of the straightness

Unit: millimeter (mm)

Axial Straightness Tolerance		Base Height (H)			
		≤18	>18 ~ 30	>30 ~ 50	> 50
Base Outer Diameter (D)	≤18	≤0.20	≤0.25	≤0.30	≤0.35
	> 18 ~ 40	≤0.15	≤0.20	≤0.25	≤0.30
	> 40	≤0.10	≤0.15	≤0.20	≤0.25

others

1. The allowed common deviations will be followed as the products tolerance,when there are no special requirements.

2. The roundness deviation of the drawing dies should be not larger 1/2 of the maximal dimensional deviation tolerance range corresponding to the outside diameter.

3. The taper deviation of drawing dies should be not larger 1/3 of the maximal deviation dimensional tolerance range of the relevant hight corresponding to the outside diameter,while the maximal value is 0.5mm.

4. There should be not defects on the surface of drawing dies such as the lamination,crack,insufficient pressed,oxidation,bubbling,contamination(sand hole).

5. No spot,hole,fragment,adhesion and vestige etc.should be permitted on the diameter finalizing section of drawing dies.

6. On the non-work section of drawing dies,the allowed depth of the vestige,adhesion,spot and burs is no more than 0.3mm,the allowed depth of the fragment is no more than 0.5mm,and the length × width is no more than 1mm × 0.5mm.

7. The maximal deviations or form and place tolerance of the former non-standard types of drawing dies will be followed according to the maximal deviations or form and place tolerance of drawings,when the customer has definite requirements.if not,then will be followed according to the deviations or form and place tolerance of the relevant current types of drawing dies.

8. The maximal deviations or form and place tolerance of the types Z11(improved) and Z13(improved) of drawing dies will be followed according to the maximal deviations or form and place tolerance of drawings,when the customer has definite requirements.if not,then will be followed according to the deviations or form and place tolerance of the relevant current types of drawing dies.

9. The concrete dimensional tolerance requirements of products could be negotiated at the time on receiving order when there are special requirement.
